Part 1: HTML Exercise: Travel Destination Overview

Objective: Create a simple HTML page to practice using the `<a>`, `<table>`, `<img>`, and `<li>` tags.

Instructions:

1. **Create a table** that displays information about three travel destinations. The table should have the following columns:
   - **Destination** (Name of the place)
   - **Country** (Name of the country)
   - **Famous Landmarks** (List of three famous landmarks using `<li>`)
   - **Image** (An image representing the destination)
   - **Learn More** (A link to a webpage with more information about the destination)
2. **Add a list** below the table, titled "Top Attractions in the World". Each list item should include:
   - A **destination name**.
   - An **image** of the destination.
   - A **link** to more information about the attraction.
3. **Include all information** within the same HTML file. You don't need to apply any CSS.

Bonus:

- Use the `width` and `height` attributes in the `<img>` tags to control the size of the images.
- Add nav links to the table and links place them at the top of the page

—------------------------

Part 2: HTML Exercise: Travel Destination Website

Objective: Create a simple website with three interconnected pages to practice navigation using `<a>` tags. This exercise builds on the "Travel Destination Overview" page created in the previous exercise.

Instructions:

1. **Create three HTML pages**:
   - **Home Page** (`index.html`)
   - **Travel Destinations Page** (`destinations.html`)
   - **Top Attractions Page** (`attractions.html`)
2. **Home Page (`index.html`)**:

- ○ This page should include a welcome message and a brief introduction to the website.
- ○ Include navigation links to the **Travel Destinations Page** and the **Top Attractions Page**.

3. **Travel Destinations Page (`destinations.html`)**:
   - ○ Use the content from the "Travel Destination Overview" exercise.
   - ○ Include a navigation link back to the **Home Page** and a link to the **Top Attractions Page**.

4. **Top Attractions Page (`attractions.html`)**:
   - ○ Use the list from the "Top Attractions in the World" section of the previous exercise.
   - ○ Include a navigation link back to the **Home Page** and a link to the **Travel Destinations Page**.

5. **Link between the pages**:
   - ○ Use `<a>` tags to create links between these pages.
   - ○ Ensure each page has a consistent navigation menu at the top or bottom to easily move between the pages.

—------------------------------

Part 3: HTML Exercise: Contact Me Form

Objective: Create a simple HTML page with a "Contact Me" form to practice using form elements, and include email and phone links.

Instructions:

1. **Create a new HTML page** called `contact.html`.
2. **Form Elements**:
   - ○ Create a form with the following fields:
     - ■ **Name**: A text input field (`<input type="text">`).
     - ■ **Email**: An email input field (`<input type="email">`).
     - ■ **Phone**: A phone input field (`<input type="tel">`).
     - ■ **Message**: A textarea field (`<textarea>`).
   - ○ Add a **Submit** button to the form.
3. **Email and Phone Links**:
   - ○ Below the form, include a link to send an email using the `mailto:` protocol.
   - ○ Include a link to call a phone number using the `tel:` protocol.
4. **Link Back to Home**:
   - ○ Include a link to navigate back to the Home page (`index.html`).

Grade factors

- use the specified names whenever defined

- DO NOT SUBMIT non indented code!!

- Links should all work

- Submitting partial tasks when previous are also partial will greatly reduce score
